

HCC Quick Reference Guide

Diagnoses

CANCER/METASTASIS:

ANY ACTIVE CANCER (PRIMARY/METASTATIC):

Differentiating between “active” and “history of” cancer: When determining active versus history of cancer, look for active treatment, such as chemotherapy, radiation, hormone therapy, watchful waiting, or patient refusal of treatment.

Remember, when coding active cancer, document specific primary sites and metastasis (secondary), if present.

Embolism and thrombosis of arteries of the upper extremities	I74.2
Embolism and thrombosis of arteries of the lower extremities	I74.3
DVT	I82.XX

HCC Quick Reference Guide Diagnoses

When documenting chronic conditions, remember:

- 1) Coding is based on clear documentation that includes a diagnostic statement and ongoing treatment plan. Any condition that is considered or affects patient care, treatment, or management at the time of the encounter should be documented and coded.
- 2) The encounter note should be a face-to-face visit and be complete, legible, concise, and contain the provider signature with credentials.
- 3) Avoid the use of uncertain diagnoses such as "suggestive of," "suspected," "consistent with" or "probable," and code to the highest level of certainty for the encounter/visit.

OSTOMIES:

Gastrostomy status	Z93.1
Ileostomy status	Z93.2
Colostomy status	Z93.3
Cystostomy status, unspecified	Z93.50
