BRUKINSA™ (zanubrutinib) is a BTK inhibitor for adults with mantle cell lymphoma (MCL) who have received at least 1 prior therapy.

BRUKINSA was approved based on response rate. There is ongoing evaluation to confirm clinical benefit for this use.

It is not known if BRUKINSA is safe and effective in children.

IMPORTANT SAFETY INFORMATION

BRUKINSA may cause serious side effects, including:
Bleeding problems (hemorrhage) that can be serious and may lead to death. Your risk of bleeding may increase if you are also taking a blood thinner medicine.

Please see additional Important Safety Information throughout, and Patient Information in the pocket.
Why is a BTK inhibitor important for MCL treatment?

MCL is caused by rapid growth and spread of cancerous B cells.

- Bruton’s tyrosine kinase (BTK) is a protein that signals to cancerous B cells, helping them to grow and spread
- Blocking BTK can help stop this signaling

BRUKINSA is a BTK inhibitor that was designed to completely block BTK.

Please see additional Important Safety Information throughout, and Patient Information in the pocket.
IMPORTANT SAFETY INFORMATION

BRUKINSA may cause serious side effects, including: Infections that can be serious and may lead to death. Tell your healthcare provider right away if you have fever, chills, or flu-like symptoms.

How well does BRUKINSA work?

In 2 clinical studies, 118 patients with MCL received BRUKINSA after at least 1 prior therapy. In both clinical studies,

84% responded to treatment, known as the overall response rate

NEARLY 80% continued to respond for a year or longer

The effectiveness of BRUKINSA may vary for different people.

Please see additional Important Safety Information throughout, and Patient Information in the pocket.
What are the most common side effects?

The following side effects occurred in 20% or more of patients taking BRUKINSA:

- Decreased white blood cells
- Decreased platelet count
- Rash
- Diarrhea
- Upper respiratory infection
- Decreased red blood cells (anemia)
- Bruising
- Cough

7% of patients discontinued treatment due to side effects in the trials.

These are not all the possible side effects of BRUKINSA. Call your doctor for medical advice about side effects.

BRUKINSA may cause serious side effects, including:
Heart rhythm problems (atrial fibrillation and atrial flutter).
Tell your healthcare provider if you have any of the following signs or symptoms: your heartbeat is fast or irregular, you feel lightheaded or dizzy, pass out (faint), have shortness of breath, or have chest pain or discomfort.

How long will I be on treatment with BRUKINSA?

You will take BRUKINSA for as long as your doctor thinks it is helping you, or for as long as side effects are manageable.

ABOUT 18 MONTHS was the median duration of treatment for patients in the clinical studies.

The median marks the midpoint where half of the patients were still taking BRUKINSA, while half were no longer on treatment.

Remember, everyone responds differently to treatment, so the length of time that you take BRUKINSA could be shorter or longer.

Please see additional Important Safety Information throughout, and Patient Information in the pocket.
How do I take BRUKINSA?

The recommended dose of BRUKINSA is 320 mg daily, which is four 80-mg capsules.

Your doctor may recommend taking all 4 capsules at the same time or 2 in the morning and 2 in the evening.

BRUKINSA capsules should be taken whole with water—do not open, break, or chew. BRUKINSA can be taken with or without food.

Your dose and schedule may be changed or interrupted by your doctor to meet your individual treatment needs including managing side effects.

Please see additional Important Safety Information throughout, and Patient Information in the pocket.
Can I take other medicines while on BRUKINSA?

Tell your healthcare provider about all the medications you are currently taking, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

What if I miss a dose?

If you miss a dose of BRUKINSA, take it as soon as you remember on the same day. Return to your normal schedule the next day.

It’s important to take BRUKINSA as directed in order to ensure you always have the amount of medicine your healthcare provider thinks is optimal for you.

What questions should I ask my doctor?

Here are some questions you may find beneficial to ask your doctor and nurse:

1. How often will I need to come in for appointments?
2. What is the correct way to take my medication?
3. How will I know if I am seeing results from treatment?
4. What should I do if I notice any side effects?
5. Are there any medications, supplements, or vitamins I should avoid taking?

IMPORTANT SAFETY INFORMATION
BRUKINSA may cause serious side effects, including:
Second primary cancers. New cancers have happened in people during treatment with BRUKINSA, including cancers of the skin. Use sun protection when you are outside in sunlight.
